

Admin Portal

Admin Portal

The **Admin Portal** is the **highest-level control center** of the POSH Training Platform. It enables administrators to manage companies, users, training videos, certificates, reports, and system settings from a single interface.

Complete Admin Portal Architecture

1. Company Management Module

This module manages all companies registered on the platform.

Functions

- | | |
|---------------------------------|------------------------------------|
| 1.1 Create company | 1.2 Update company details |
| 1.3 Activate/Deactivate company | 1.4 Configure language preferences |
| 1.5 Maintain employee strength | 1.6 View company reports |

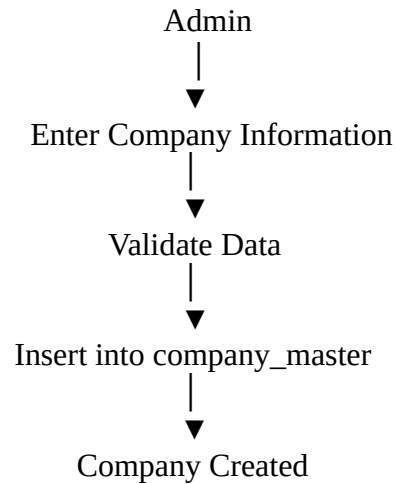

Tables

company_master

company_languages

1.1 Create Company - Used to register a new company on the platform.

Process

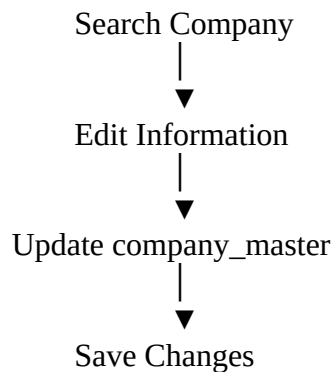

1.2. Update Company Details

Allows modification of existing company information.

Examples:

- Change address Update contact email Modify employee strength Update website

Process

1.3. Activate / Deactivate Company -

Controls whether a company can access the platform.

Active : Company Status = **Active**

Users can: ✓ Login ✓ Watch Videos ✓ Take Assessments ✓ Download Certificates

Inactive : Company Status = Inactive

Users cannot: ✗ Login ✗ Access Training ✗ Generate Certificates

Example: UPDATE company_master SET status='Inactive' WHERE company_id=1;

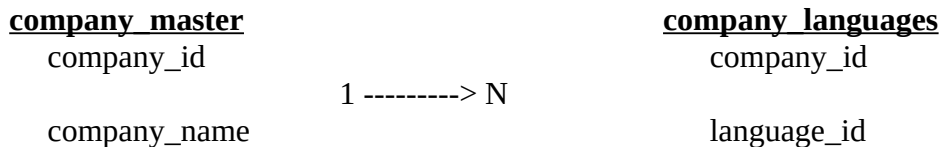

1.4. Configure Language Preferences

Companies can choose one or multiple training languages.

Supported Languages : English, Hindi, Tamil, Telugu, Malayalam, Kannada

Since one company can have multiple languages, a separate table is used.

Relationship

Example

ABC Ltd
|
|---- English, Tamil , Hindi

1.5. Maintain Employee Strength

Stores the number of employees in the company.

Example:

ABC Technologies
Current Employees : 100
After Hiring
Current Employees : 125

Used for:

- Analytics , Reporting

1.6. View Company Reports

Provides statistics for companies.

Reports

Total Companies = 150 Active Companies = 145 Inactive Companies = 5

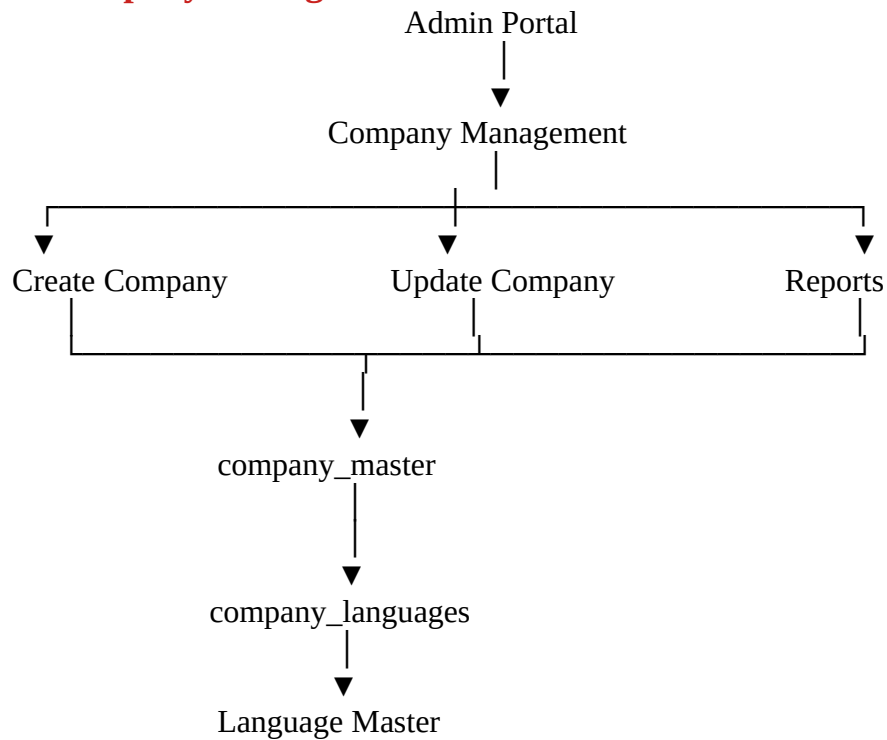

Industry-wise Report

IT Services	70	Finance	30
Healthcare	20	Manufacturing	30

Year-wise Company Registration

2024 → 30 Companies 2025 → 60 Companies 2026 → 60 Companies

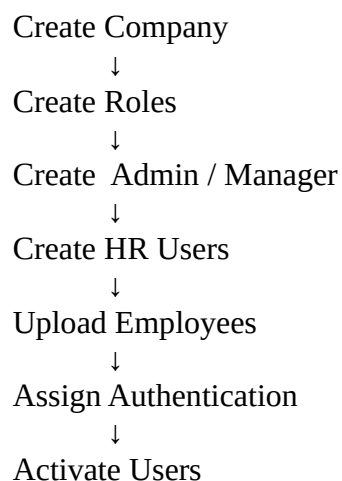

Overall Company Management Architecture

2. User Management Module

The **user_master** table is the core table in the User Management module. It interacts with Company, Role, Permissions, Language, and Authentication components. Manages administrators / managers , HR and employees. Each company can only access its own data.

User Creation Workflow

User Types

- | | | |
|----------------------------|-------|-------------|
| 1. Company Admin / Manager | 2. HR | 3. Employee |
|----------------------------|-------|-------------|

Features

- Add users
- Edit users
- Delete users
- Reset passwords
- Role assignment
- Activate/deactivate accounts
- Bulk upload from Excel or CSV

Complete Architecture

3. Video Management Module

Manages POSH training videos.

Features

Upload Video Edit Video Delete Video Publish Video Archive Video

Multi-language Support

English Hindi Tamil Telugu Malayalam Kannada

Storage : AWS S3 Azure Blob **Local Storage**

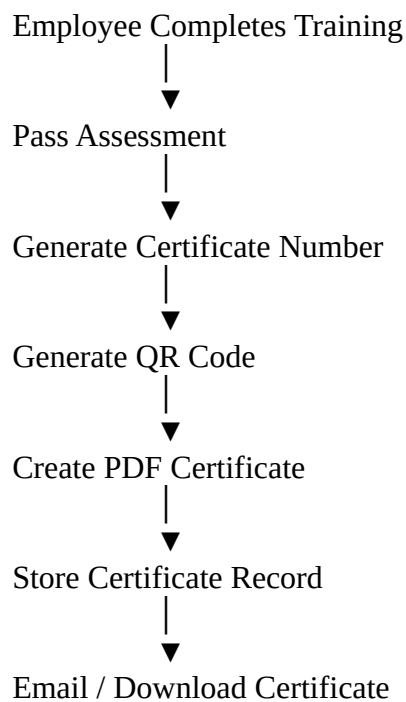

Tables : video_master video_category video_language

Note : Video Screen – More Points are there

4. Certificate Module

Automatically generates certificates after course completion.

Certificate Workflow

Components

Company Logo	Company Name	Certificate Title	Employee Name
Course Name	Completion Date	Certificate Number	QR Code
Authorized Signature			

Features

- Template creation
- QR verification
- PDF generation
- Logo and signature customization
- Email delivery

Tables

certificate_template certificates

Certificate Template Management

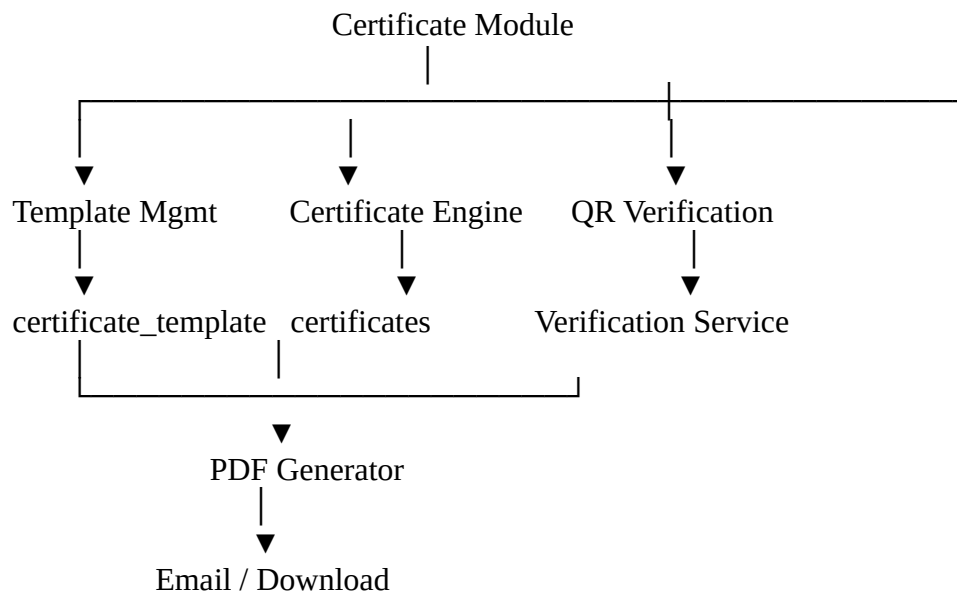

Administrators can create multiple certificate templates.

Features	Upload company logo	Add signatures	Select fonts
	Choose colors	Customize layout	Add QR code location

Template Flow

Admin ----> Create Template ----> Upload Logo ----> Configure Design ---> Save Template

Complete Certificate Module Architecture

Certificate List Screen

Search Certificate Number :

Certificate No	Employee	Date	Status
POSH2026-001	Ravi	Active	Download
POSH2026-002	Kumar	Active	Download

Certificate Template Screen
